Siemens

Siemens is a global powerhouse focusing on the areas of electrification, automation and digitalisation, that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 165 years. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of systems for power generation and transmission as well as medical diagnosis. In infrastructure and industry solutions the company plays a pioneering role. As of 30 September 2015, we had around 348,000 employees in more than 200 countries. In fiscal 2015, we generated revenues of €75.6 billion

Siemens has been in Australia and New Zealand for 143 years and now employs about 2,000 people. Our technology can be found behind the scenes supporting critical infrastructure, and almost every industry. The company's fingerprint can be found supporting everything from generating efficient and clean energy through to advanced medical imaging and diagnostics equipment. You will find Siemens automation, electrification and digitalisation technology in everything from the lane change controls on the Sydney Harbour Bridge, through to energy efficiency at the MCG and even hi-tech simulation used to help protect the Great Barrier Reef. Significant industries ranging from oil and gas to mining, roads and rail, food and beverage, manufacturing, buildings and construction, pharmaceuticals, water and energy utilities and even the latest wind farms being built in South Australia all rely on Siemens technologies.

Siemens has a number of MoUs signed with stakeholders including Engineers Australia, Simulation Australasia and the South Australian Government; as well as an MoU with Defence Science and Technology Group and Queensland University of Technology to advance High Temperature Superconductors. Siemens has contributed over \$AU5 million of technology and software in support of these MoUs. Other recent investments include new Service Centres built in Rockhampton, Perth Airport, and Tonsley Technology Precinct in South Australia.

With a global view on the trends and changes affecting the world now and in the future, Siemens actively supports local industry, governments and stakeholders to understand and prepare for key changes such as the fourth industrial revolution (Industry 4.0), the transition to intelligent infrastructure and the transition to a sustainable energy future.

Event major sponsor

Jemena

Jemena is an \$11 billion company that owns and manages some of Australia's most significant gas and electricity assets. These include:

- the Jemena Gas Network servicing 1.3 million customers around NSW
- the Eastern Gas Pipeline which delivers gas from Victoria's Gippsland basin to the ACT, Sydney and regional NSW
- the Darling Downs Pipeline Network in south-east Queensland supplying Darling Downs Power Station and APLNG's export pipeline
- the Queensland Gas Pipeline which supplies Gladstone and Rockhampton
- the Darling Downs Pipeline System which transports gas to the Wallumbilla gas trading hub, the 630MW Darling Downs Power Station, and to the feeder pipeline to the APLNG LNG liquefaction plant at Gladstone
- Jemena's Victorian electricity network which delivers electricity to over 343,000 homes and businesses in northern and western Melbourne
- the Northern Gas Pipeline from Tennant Creek in Northern Territory to Mount Isa in Queensland.

Jemena also part-owns the ActewAGL electricity and gas distribution networks in the ACT and United Energy, which supplies electricity to more than 600,000 customers across south-eastern Melbourne and the Mornington Peninsula.

More information on Jemena can be found at www.jemena.com.au

keynote speaker

The Hon. Mark Butler MP

Shadow Federal Minister for Climate Change and Energy

Twitter: @MarkButler

Mark Butler has been the Labor Member for Port Adelaide in the Federal Parliament since 2007 and is the Shadow Minister for Climate Change and Energy.

Mark served as Minister for Ageing and Australia's first Minister for Mental Health in the Gillard Government. He has also held the ministries of Housing, Homelessness, Social Inclusion, Climate Change, Water and the Environment.

In 2013, Mark was awarded the Alzheimer's Disease International Award (ADI) for Extraordinary Contribution to Tackling Dementia.

He was elected as National President of the Australian Labor Party in 2015.

Mark is the author of *Advanced Australia - The Politics of Ageing*, published in 2015; and *Climate Wars*, published in 2017.

chair

Jeff Connolly

Chairman and Chief Executive Officer, Siemens

Twitter: @Siemens_Aus

Jeff Connolly is Chairman and Chief Executive Officer of Siemens in the Pacific region. Siemens has been active in Australia since 1872, has a turnover of > A\$2 Billion employing over 2200 people. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of systems for power generation and transmission and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. Approximately 30% of Australia's capacity to generate electricity is enabled by Siemens technology.

Jeff's many roles include President of Ai Group Victoria Council, Chairman of the German-Australian Chamber of Industry and Commerce, Director of the European Australian Business Council; and Founding member of the Australian Advanced Manufacturing Council.

introduction

Frank Tudor

Managing Director, Jemena

Twitter: @JemenaLTD

Frank has more than 30 years' experience in the international oil, gas, and power industries having held various senior executive roles across the sector throughout his career. Before joining Jemena Frank was CEO at Horizon Power – Australia's only vertically-integrated electricity utility which provides energy services to customers across regional Western Australia.

Frank holds first class degrees in engineering, economics, and business administration from Curtin University (WA), the London School of Economics (UK) and AGSM (the University of NSW). He has also completed the Advanced Management Program at Harvard Business School and lectured in oil and gas economics and legal frameworks at the University of Western Australia.

Frank also serves on the Expert Advisory Panel with the Australian Energy Market Operator (AEMO), is a Board member of Energy Networks Australia (and is Chair of its Asset Management Committee), and is also a former member of the Federal Government's Australia China Council.

about CEDA

CEDA is an independent, not-for-profit membership organisation. CEDA identifies policy issues that matter for Australia's future and pursue solutions that deliver better economic, social and environmental outcomes for Australia. CEDA's cross-sector membership spans every state and territory and includes more than 780 of Australia's leading businesses, community organisations, government departments and academic institutions.

Membership

Organisations join CEDA because CEDA delivers exposure to high level thought leadership, timely briefings on issues of economic importance, access to networking and brand reach through sponsorship and hosting opportunities. In addition to high profile public events, CEDA also delivers regular member only events for employees of member organisations and exclusive Trustee only boardroom briefings for senior executives from member organisations. These provide a unique opportunity for peer-to-peer knowledge exchange and for speakers and attendees to talk candidly on issues.

Research and policy

CEDA's only agenda is to pursue good public policy to progress Australia's economic and social development. Since 1960 CEDA has produced more than 3000 publications, research reports and articles highlighting emerging issues and directions in a diverse range of policy areas. Research in 2019 will focus on Australia's long-term budget position, the effects of temporary migration, a survey of Australian businesses on their approach to economic development, and new approaches to addressing entrenched disadvantage.
